DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-8, drawn to a catalytic converter, classified in class 422, subclass 177.
 - II. Claims 9-14, drawn to a method for manufacturing a catalytic converter, classified in class 29, subclass 890.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process, such as the one not requiring the roll stamping indentations nor shot-blast etching, etc.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, recognized divergent subject matter and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
